### Assignment for Week 12

#### Make a print style sheet for one of your pages.

Continue working on the Horizontal Page for your portfolio interface. The portfolio page should be designed to scroll horizontally.

Start to implement the CSS for this page; use one of the 'Perfect' layouts on the class links as a template

note: the next project, 'The Remapped Page' will use an Adaptive Page Layout

If you haven't done so already, try out siFR and add at least 1 header using siFR in one of your projects

### Important Links:

<http://www.annetteweintraub.com/courses/49540/49540.html>

### New elements to incorporate in your pages:

use siFR to replace a styled type element somewhere on one of your pages

create a print style sheet

make a style sheet external using <link> or @import

split style sheets so you have a type sheet + a format sheet [optional]

on either the Horizontal Page or the Remapped Page, use a dropdown or rollover list-based menu

on the last project, the Remapped Page, we will use an Adaptive Layout
