

Week 10:

Topics: [copy the Week 10 Class Links page & handouts from the server]
cúfon
@font-face
siFR [scalable Inman flash replacement] v2

Assignment for Week 10

Revise your design for the 'Horizontal Page' for your final portfolio interface as needed and translate the design into an HTML/CSS page with **placeholders**

you should have:

a functional HTML page with all content areas clearly indicated
a PSD or ai that shows the design
the visual elements [portfolio images] prepared for your site

Portfolio considerations:

Branding, graphic identity: logo or other ID elements
grid/page layout to incorporate a number of different image sizes/shapes
navigation

text paragraph: how do you introduce yourself?

any other items: links, contact info, etc.

optional items

- tabbed menu
- image drop shadow [see Chapter 8, pp 183-195]
- photo/image gallery with rollovers [see <http://www.cssplay.co.uk> photo galleries]

Try out CUFÓN and @font-face on a new version of the color box layout
replace a headline, subhead and a text block.

Plan on using one of the type techniques on your portfolio pages

Items checklist

These elements should be somewhere on your pages for the final

- opacity element
- fixed position element
- fixed background element
- rounded corners box
- by the end of the semester: use absolute, relative, fixed and float positioning
- correctly use px, % and ems for font sizing
- horizontal list menu
- image gallery

- siFR element [new week 10]

Optional items:

- tabbed menus
- dropdown menu
- dropshadow

always:

organize your CSS & comment
use CSS resets
for now, keep your CSS in the header

**Copy your page and .css file
to your name folder on the
server for Week 3 BEFORE
class**
